

Helping hands for your Forklift truck

## Fork Positioners

### T160 · T466

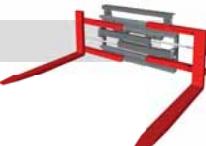

T160 · T466

Along with sideshifters, fork positioners are amongst the most commonly used attachments on forklift trucks. Fork positioners are a valuable work aid wherever loads of varying widths need to be handled, requiring the fork spacing to be adjusted accordingly. Use of KAUP high-visibility fork positioners enables the truck operator to control fork spacing conveniently from the driver seat. This increases the operating efficiency of the forklift and greatly reduces accidents.

- Enlarging the supporting width improves the stability of wide loads while diminishing the risk of the load slipping off the forks if picked up off centre.
- Adjusting the supporting width to the width of the load prevents over loading any part of the mast.
- The high-visibility design ensures the driver exact and precise working with the fork positioner which guarantees high job performance with a low risk of accidents.

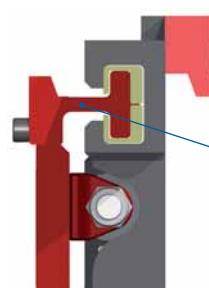

## Application recommendation for KAUP Fork Positioners

|   |  |  |
|---|--|--|
| <b>T163SN*</b><br>Light duty            |   | Fork carriage guided fork adjustment for pick-up of pallets with different widths · Principally level working conditions · Ideal for working in production halls i.e. relatively clean environment · Opening range restricted to the width of the attachment                                     |
| <b>T160(Z) / T466(Z)</b><br>Medium duty |   | Frequent fork adjustment · Operating with long forks · Different kinds of goods and ways of handling (e.g. forwarders) · Outdoor operation · Opening range can be slightly larger than the width of the attachment   |
| <b>T411Z*</b><br>Heavy duty             |  | Heavy duty version · Load picked up between the forks · Use of long forks and load pick up at fork tips · Frequent load pick up with max. opening range and pick up to top limit of capacity · Uneven floors · Quick working cycles · Opening range much larger than the width of the attachment |

\* further information can be found in the brochures showing the range T163SN and/or T411Z

## KAUP Fork Positioners range T160 and T466

Fork Positioners of the T160 and T466 range ensure that the forklift truck driver has an unobstructed view of the fork tips and load. Using state-of-the-art 3D technology the T160 and T466 components are specifically matched to the requirements specified. As a result the units feature high stability along with optimised tare weight, low lost load center and thus a very good residual capacity, excellent view because the design was optimised with regard to visibility, minimised wear, a service-optimised design, and thus low maintenance and operating costs.

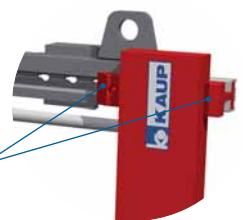

ISO profiles and guide profiles are manufactured from one piece which gives the attachment a high degree of rigidity and solidness. Therefore cracks caused by tension or fatigue, which occur on a welded design, can not develop.

**Load Backrest T479:** The fork positioner can be fitted on site with a load backrest type T479.

**Optimised service:** The highly wear-resistant sliding profiles can, when necessary, be replaced quickly and simply on site without the use of special tools.

**Z-Version:** the guide profiles are wider than the fork shanks. This increases stability and reduces wear and tear.

Adjusting screws to compensate tolerances between the forks and fork carriage.

## KAUP Fork Positioners – range T160

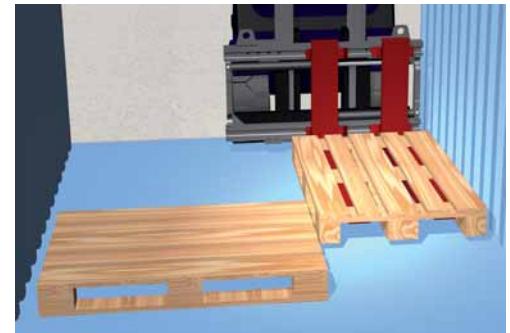

The range T160 with optimised visibility and residual capacity is fitted with valve block sideshift as standard. As valve block sideshift uses the rest stroke of the cylinder for the sideshift function the lateral shift is dependent on the fork position. Depending on the construction width of the attachment a lateral shift of up to  $\pm 300$  mm can be achieved. The possibility of the load being picked up off centre must be taken into account when calculating the residual capacity.

Fork Positioners in the range T160 are alternatively available without a sideshift function.

Choose the optimal attachment for your type of operation from the four variations of T160 available:

- T160.....hook-on attachment with fork carriage bars for attaching the original forks in accordance with ISO 2330;  
*standard forks with all dimensions and lengths up to 2.400 mm  
mechanical adjustment of forks on the fork carriage bars (different opening ranges)*
- T160I.....integrated attachment with fork carriage bars for attaching the original forks in accordance with ISO 2330;  
*increased residual capacity of approx. 10 - 15%  
mechanical adjustment of forks on the fork carriage bars (different opening ranges)*
- T160Z(A) ...hook-on attachment with welded or screw-on (A) forks;  
*T160Z - with forks welded onto the guide profiles  
T160ZA - with screw-on forks suitable for operation with a high degree of wear and tear*
- T160IZ(A)..integrated attachment with welded or screw-on (A) forks;  
*increased residual capacity of approx. 10 - 15%  
T160IZ - with forks welded onto the guide profiles  
T160IZA - with screw-on forks suitable for operation with a high degree of wear and tear*

**Container loading:** the T160 Fork Positioner with valve block sideshift enables loading and unloading pallets lengthwise on the side walls of the container as it is possible to extend beyond the chassis width.

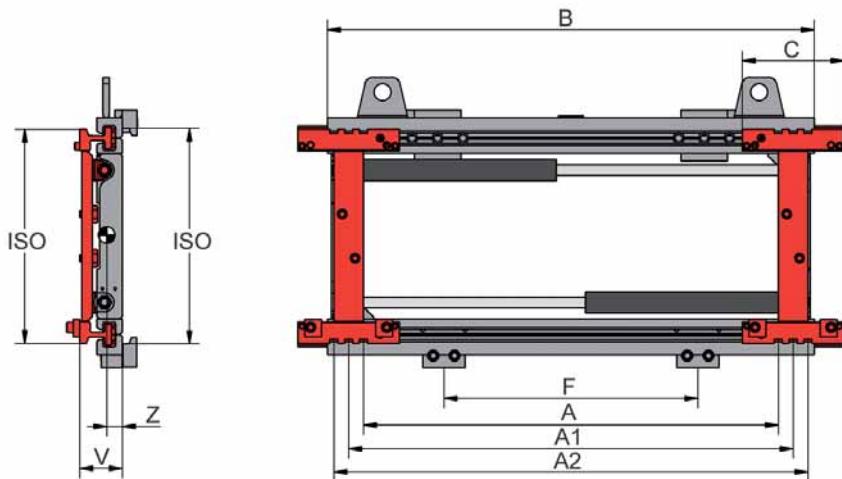

## KAUP Fork Positioners – range T466

The range T466 with optimised visibility and residual capacity is fitted with separate sideshift as standard. This ensures that the permissible lateral shift is fully utilized at any position of the forks. The KAUP separate sideshift components are designed so that there is no loss of residual capacity. The needle bearing roller guided bottom hooks (**SMOOTHROLL**) considerably reduce friction and ensure energy efficient operation of the attachment. End of stroke slow-down (**SOFTSTOP**) considerably reduces the speed over the last 15mm and thus prevents accidents due to loads falling off and protects the mast components. Furthermore lateral stability is enhanced which ensures the stand stability of the forklift truck.

Choose the optimal attachment for your type of operation from the four variations of T466 available

- T466.....hook-on attachment with fork carriage bars for attaching the original forks in accordance with ISO 2330;  
*standard forks with all dimensions and lengths up to 2.400 mm  
mechanical adjustment of forks on the fork carriage bars (different opening ranges)*
- T466I.....integrated attachment with fork carriage bars for attaching the original forks in accordance with ISO 2330;  
*increased residual capacity of approx. 10 - 15%  
mechanical adjustment of forks on the fork carriage bars (different opening ranges)*
- T466Z(A) ...hook-on attachment with welded or screw-on (A) forks;  
*T466Z - with forks welded onto the guide profiles  
T466ZA - with screw-on forks suitable for operation with a high degree of wear and tear*
- T466IZ(A)..integrated attachment with welded or screw-on (A) forks;  
*increased residual capacity of approx. 10 - 15%  
T466IZ - with forks welded onto the guide profiles  
T466IZA - with screw-on forks suitable for operation with a high degree of wear and tear*

CofG and weight measurements do not take the cheek plates into account.

Forks suitable for above attachments available upon request.

Fork carriage drawings, roller studs and chain anchors to be supplied by customer if necessary.

Not suitable for clamping between the forks.

1) Min. width of FLT carriage.

\* 4,8T with capacity (kg/mm) 2.700/1.200 available upon request.

Not suitable for clamping between the forks.

**ZA-Version:** with screw-on forks suitable for operation with a high degree of wear and tear and quick exchange of forks on site.

CofG and weight measurements do not take the cheek plates into account.

Fork carriage drawings, roller studs and chain anchors to be supplied by customer if necessary.

Not suitable for clamping between the forks.

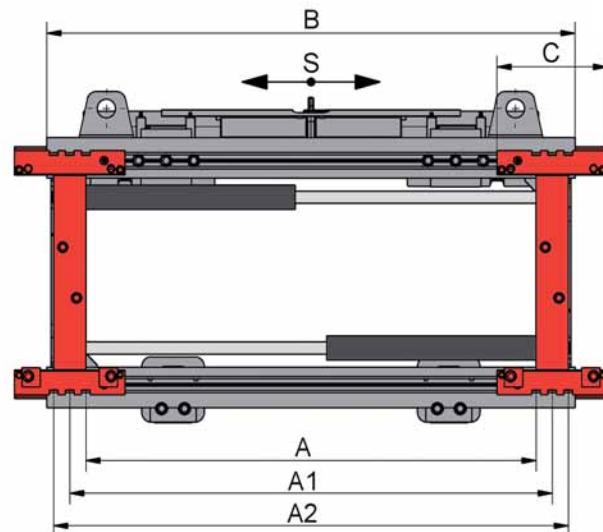

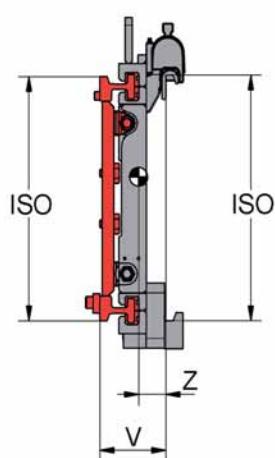

Larger models and different widths available upon request.

**IZA-Version:** with screw-on forks suitable for operation with a high degree of wear and tear and quick exchange of forks on site.

CofG and weight measurements do not take the cheek plates into account.

Fork carriage drawings, roller studs and chain anchors to be supplied by customer if necessary.

Not suitable for clamping between the forks.

Larger models and different widths available upon request.

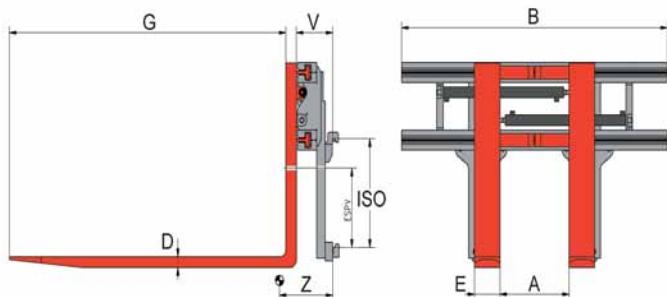

**IZA-Version:** with screw-on forks suitable for operation with a high degree of wear and tear and quick exchange of forks on site.

## Fork Positioners for Reach Trucks

As the leading manufacturer of industrial truck attachments, KAUP supplies a complete range of attachments specially designed for reach trucks. Due to the complexity of the scope (details regarding the wheel arms, ground clearance, width of the attachment etc.) it is advisable to contact our specialists directly for an individual quotation.

### Fork Positioner T466ZH

without sideshift - 1 hydraulic function

Fork Positioner T411IZH and T411ZH available upon request.

### Load Backrest T479

for KAUP fork positioners

| Model    | B mm  | H mm | Weight kg |
|----------|-------|------|-----------|
| 1T 479   | 970   | 500  | 26        |
| 1,5T 479 | 970   | 500  | 26        |
| 2T 479   | 1.130 | 500  | 28        |
| 3T 479   | 1.130 | 500  | 28        |
| 4T 479   | 1.130 | 500  | 32        |
| 5T 479   | 1.330 | 500  | 37        |
| 6T 479   | 1.550 | 500  | 48        |
| 8T 479   | 1.860 | 500  | 55        |
| 10T 479  | 2.060 | 500  | 78        |

All parts required for correct fitting to the standard lifting lugs on the attachment will be delivered with the load backrest.

## Symbols

**Operation in explosion hazardous areas**  
Modified available for operation in explosion hazardous areas according to the ATEX standard 94/9 EG II 2G c IIB T4.

**Load Backrest**  
Later fitting of a load backrest possible without modification.

Also available with sideshift.

Also available without sideshift.

Alternatively available with bolt-on forks.

KAUP attachments correspond to the requirements of the EEC regulations regarding quality, safety and technical documentation. Therefore all products will be delivered with CE-Mark. All technical data are subject to alteration.

KAUP is certified acc. to DIN EN ISO 9001
